

Cosmetic Tattoo

get up and go

by Selina Lam of Beauty Access

Selina Lam

Cosmetic tattooing gives you instant confidence, as you can look younger and always at your best. The procedure is used to help you with:

- Perfect eyebrows
- Subtle natural eyes
- Attractive lips
- Beauty spots
- Burn scars
- Port wine stains
- Vitiligo
- Breast /areolas
- alopecia

Cosmetic tattooing is also referred to as micro pigmentation, semi-permanent makeup and permanent cosmetics. It is a cosmetic technique which resembles makeup such as eyebrows, eyeliners and lip liner. If you have fair eyebrows, no eyebrows or partial eyebrows, lipstick bleeding or constantly smudged eyeliner, a cosmetic tattoo can help to give definition to the brows, eyes and lips, and you can put away your pencils forever. You can go swimming, not have to bother with mid-day makeup touch-ups and look good all the time.

As with other tattooing, the therapist uses a needle that penetrates the top layer of your skin and releases pigment. You may feel a slight stinging. After the procedure it takes about 3 to 4 weeks for the colour to fade and heal to its permanent colour. At first, the colour will look dark and shiny and the surrounding skin may be slightly swollen and tender to touch, this varies from person to person depending on the design, color and amount of pigment used. Colour softens within few days during the healing process as the upper layers of the epidermis slough off.

Create Beautiful Eyebrows

Eyebrow shape can be designed to give an illusion of an eyebrow lift to open up the eyes, especially if the eyelids are droopy, to give a more youthful appearance. Full eyebrows or individual hairs can be created, depending on the state of your eyebrows and your request, to give softer, more natural looking eyebrows.

Define Soulful Eyes

The eyes are the window to your soul and are the feature that people look at the most when talking to you. The shape can be enhanced to give an appearance of larger eyes and a younger look. Shadowing effects to give a smudgy look can be created to give a more natural soft eyeliner, or 'designer' eyeliner.

Rediscover Kissable Lips

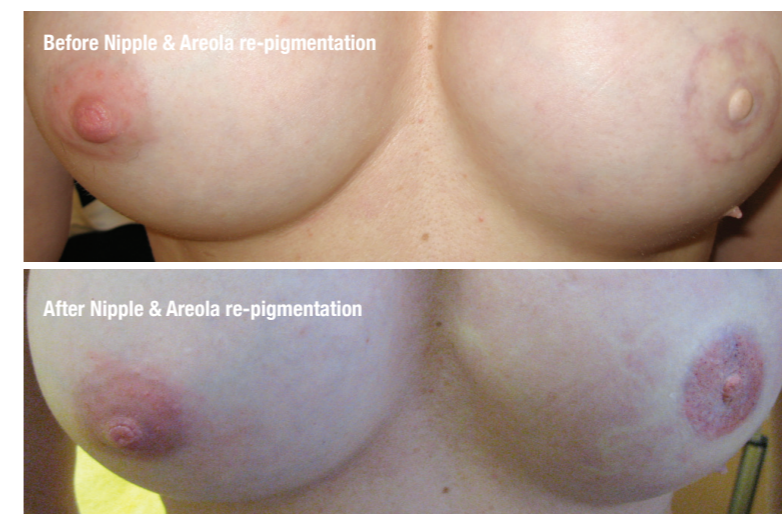

Cosmetic tattooing of the lips restores their fullness, gives a youthful appearance and enhances definition. Lips can be re-defined to give a natural line and prevent lipstick bleeding or ever having to re-apply lipstick after eating.

Colouring Your World – A Creative Skin Solution

Cosmetic tattooing is also used for more serious applications such as re-pigmentation. It is used to restore, enhance and improve the appearance of a nipple and areola after breast reconstruction from breast cancer, white spots in the skin such as vitiligo, port wine stains, surgical scars, burn scars, cleft lips and cosmetic tattoo adjustments and corrections. Some applications may involve a lengthy process and require several appointments to get the desired results.

While cosmetic tattoo pigment remains in the dermis its beauty span may be influenced by several factors. These can include environmental, procedural and/or individual factors. Sun exposure will fade colour and skin tones are a factor in colour value changes over time. You must expect your cosmetic tattoo procedure to fade somewhat over time and a colour refresh may be necessary based on individual preferences. Choosing a cosmetic tattoo professional can be one of the most important

decisions. You can change your life for the better by selecting an expert permanent cosmetic tattoo professional specialising in advanced procedures. As this procedure is permanent, make sure the person you see has the appropriate skills and do not shop on price. Do your research. Once you have selected your therapist, communication is very important, as the therapist will need to work with you to genuinely understand what you want to give you a positive experience.

SofTap® Australia
